## The Recycle Project

Expanding opportunities for young people and equipping them with the tools for a successful working life

Motov8 is a registered charity that works to reach young people in an effort to promote re-engagement with education and reduce social exclusion

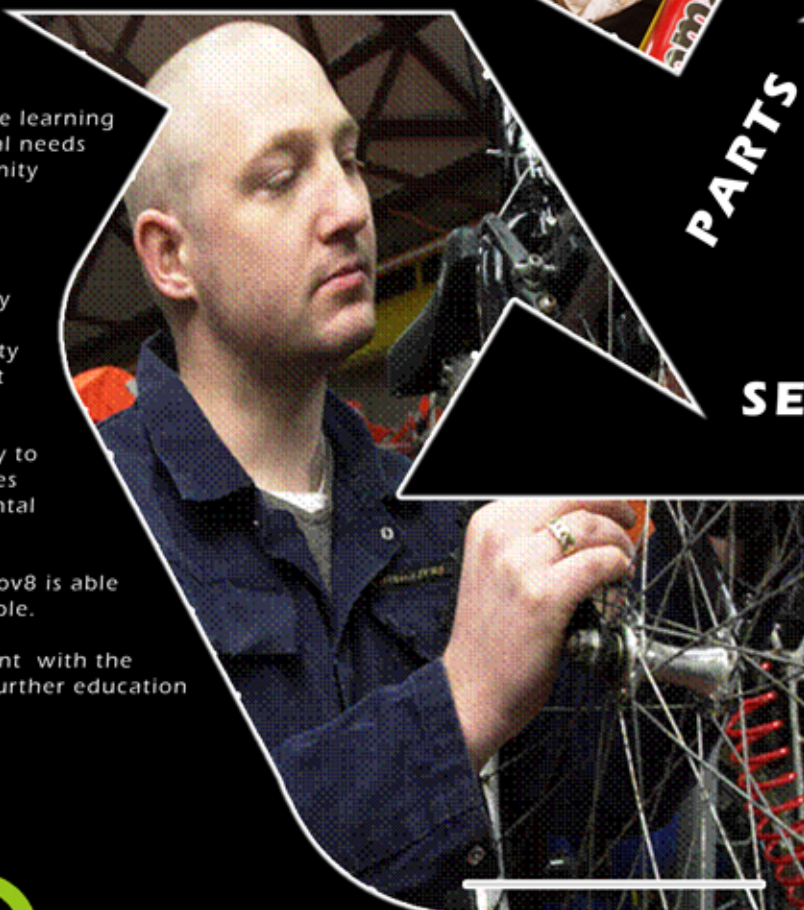

The charity endeavours to create a secure and safe learning environment where the educational and emotional needs of each individual are addressed and the opportunity for progression is maximised. What young people achieve whilst they are with us can make a real difference to their lives.

One of our key aims is to increase employability by providing a period of 'sheltered work placement' during which young people can learn responsibility and the appropriate behaviour & skills needed not only to get a job but to keep it!

The recycle project offers an excellent opportunity to engage young people in positive practical activities which provide educational, social and environmental benefits.

Through refurbishment of unwanted bicycles motov8 is able to provide education and training for young people.

We provide continual support and encouragement with the aim of positive progression into employment or further education and positive contributions in the wider world.
